And Jeweler

## Meeting of School Board

A meeting of the School board was held last night, the full board being present.

The minutes of the two previous special meetings were approved as read, and accounts totalling about \$400 were passed for payment.

A number of communications were read to the meeting, a couple of which were from the department of education at Edmonton, respecting the appointment of attendance officer and regular forwarding to the department of reports from such officer. The secretary was instructed to give all the information required. A communication from ex-Secretary Wright was laid on the table to be considered at next meeting.

The question of tax arrears occupied considerable time of the meeting, and it was decided to take any drastic steps necessary against delinquents.

The chairman of the board was asked to submit to the board of public utilities commissioners, through the secretary of the board, plans and specifications of proposed addition to the school building. In this connection, some members of the board would favor the erection of a four-room brick structure, separate from the present frame structure, rather than add to the present building with frame work. But it was definitely decided to submit plans for a frame extension, which would give two more rooms. It was decided to increase insurance of school buildings and equipment by \$5000.

## Household Science Short Course

First Aid, Home Nursing, Food and Cookery for the Women and Girls of Blairmore and Surrounding District

Through the efforts of Mr. Robert E. Campbell, member for Rocky Mountain, women of this district will have the opportunity of availing themselves of the services of instructors in first-aid, home cooking, home nursing, etc., and a cordial invitation is extended to all women and girls of Blairmore and district to attend the Household Science Short Course in Home Nursing, First Aid, Food and Cookery, to be held at Blairmore on Monday, Tuesday and Wednesday, April 19th, 20th and 21st.

Demonstrations on First Aid and Home Care of the Sick will be given by Miss Martha MacBeth, R.M. Miss Barbara MacBeth, household science instructor in the Carleton Place School of Agriculture, will give demonstration lectures on "Economic Menu" and "Home Canning of Fruits, Vegetables and Meats."

The course, which is free, will be held under the auspices of the Alberta Women's Institutes.

Notice with reference to the hour and place of meeting will appear later.

The Western Independent of recent date makes the following apt remark concerning prohibition in Alberta:

"Provincial prohibition is like appointing two old women to stop the Bow river with a plank. The trouble with the Bow river is that the snow melts in the mountains in the summer time and the water just can't help running down. Drink will run east, west, north and south just as long as its course is left to furnish the supply. Such kind of prohibition is an expensive fiasco. It increases the expenditure of drink, increases immorality and does not decrease drink consumption."

## Heard in a British Law Court

Counsel—Was the prisoner sober?  
Witness—No, sir, he was as drunk as a judge!  
The Judge—You mean as drunk as a lord!  
Witness—Yes, my lord!

## "The Minister's Bride"

Following is an outline of the scenes and characters in the popular play to be staged at the local opera house on Tuesday night next by local talent:

SCENE I.—Afternoon at minister's home. A number of women arranging parlor for the forthcoming of the minister and his bride from their honeymoon.

SCENE II.—Afternoon in minister's parlor. A number of parishioners call to pay their respects to the minister and his "Missus."

SCENE III.—Evening at minister's home. Taking advantage of Leap Year, a would-be bride drags a reluctant bridegroom to the minister's home.

SCENE IV.—Evening at minister's home. One week after return of minister and bride. A number of young people at a party.

Play dates fifty years back, all costumes, etc., in keeping with that time.

## Red Cross Tea

Members and friends of the Red Cross Society will meet at the home of Mrs. J. H. Farmer on Tuesday afternoon, April 13th, at 3 o'clock. Tea will be served and a small sum—not less than 25 cents—will be charged. The proceeds will be used to provide funds for another whist drive for the boys at the Sanatorium.

## To Spend \$13,000,000 on Nova Scotia Highways

That \$13,000,000 will be expended upon the roads of Nova Scotia during the next five years in an ambitious program that would give the province the best average roadways on the North American continent, was announced by Hon. H. H. Wickwire, minister of highways, who laid the report of the commissioner of highways upon the table of the Nova Scotia house of assembly last week. He said the program which had been adopted by the Nova Scotia government covered a period of five years. This year they propose to spend \$2,605,000 on the roads of Nova Scotia. Some comparison with Alberta's \$300,000 grant!

## Almost Heartrending

She laid the still white form beside those that had gone before. No groan, no sigh burst from her. Suddenly she let forth a cry that pierced the still night air, making it vibrate into a thousand echoes. It seemed as if it came from her very soul. Twice the cry was repeated, and then all was quiet again. She would lay another egg tomorrow.

Word has been received from Halifax that an army of 70,000 men is to move across Canada within the next few weeks. The men are Czech Slovaks, who have been stationed in Asia, and it is said that they are being sent to their homes in Europe by way of the Dominion to avoid travelling through Bolshevik territory and neutral countries.

# U.S. Censored For Interference In Irish Question

London.—The United States was handled without gloves by Premier Lloyd George and Sir Edward Carson the Ulster Leader, in the debate in the house of commons on the second reading of the Irish bill. The premier said it was action such as that taken by the United States senate in adopting the Irish resolution that had fostered secession.

"De Valera is putting forth the same views in the same words that Jefferson Davis used," the premier declared, and added that such a movement has led to civil war.

"We are doing nothing more than the United States claimed for themselves," he continued, "and will stand no less."

Sir Edward Carson, in opening the debate, said he believed that the Irish murders were committed, "not by any countenance but by ill-conditioned Americans, misled by Sinn Féin propaganda, which," he exclaimed, "you are doing nothing to counteract."

"Do you suppose that if I worked against the bill and it was killed and the 1914 act becomes effective, I could call upon my followers to get their rifles to maintain our position in the six Ulster counties, when this bill gives us the right to control these counties?" asked Sir Edward Carson. He declared that Mr. Asquith, by his proposals for amending the 1914 measure, "killed his own child," which was so distasteful to Ulster.

He promised that Ulster would do the best it could under the two-parliament plan.

Premier Lloyd George also attacked the Asquith plan, saying that it was leading to the proclamation of an Irish republic and secession.

Wm. Adamson, labor leader, said he was opposed to the bill and that his followers had adhered to his decision in a vote, but he did not outline any definite plan for a solution. He stated his personal views, which, he said, should not be confused with the views of his party, as he had not placed them before the leaders of Labor. He was for one parliament with full powers for everything, except defence and foreign affairs, and for immediately calling a constituent assembly.

The second reading of the bill was passed by 348 to 94. Those who voted against it included Mr. Asquith and his following among the independent Liberals, the Irish Nationalists and a few Unionists.

The attendance for the vote was the largest during the present session.

**Plot to Murder Carson**  
Montreal.—The Montreal Star publishes the following cable from London:

"During the debate on the Irish Home Rule bill, Sir Edward Carson, the Ulster leader, said to have been warned by Scotland Yard that Clan-na-Gael members had landed from the United States with the avowed intention of assassinating him."

**To Represent Italy**  
Copenhagen.—General Albertoni, former minister of war, has been appointed to represent Italy on the inter-allied commission at Constantinople.

## Asquith Makes An Attack On Home Rule Bill

London.—Herbert H. Asquith, former premier and advocate of a one-parliament Ireland, took issue in the house of commons on the home rule question with Premier Lloyd George, whose plan for two parliaments for Ireland Mr. Asquith has characterized as absolutely unacceptable.

Particular interest is centered in the contest between the premier and former premier, both of whom aspire to the leadership of the liberal party. But as yet they have not come to grips.

The fact that agitation is so widespread in Ireland at the present time lends added interest to the ultimate outcome of the bill now before the house, but the real fight will not be on until the committee stage has been reached.

## Threaten Strike in Germany

**Labor Unions of Essen Will Call A General Strike Unless All Demands Granted**

Rotterdam.—A despatch to the Rotterdam Courant from Essen says the representatives of the labor unions and of the three Socialist parties have issued an ultimatum to the government threatening a general strike in all Germany unless their demands are granted.

The demands are: First, binding the government to recognition of the resolutions passed at Bielefeld; second, abolition of military measures contrary to the resolutions; and third, the recall of Gen. Von Watten and granting forty-eight hours in which to carry out the Bielefeld armistice terms.

## Only Rumors That Wheat Is Hauled to U.S.

**Acting Premier Declares Government Cannot Act Without Proper Confirmation**

Ottawa.—Answering Hon. MacNutt, Saltee, in the commons, Sir George Foster stated that the government had heard that some farmers were shipping wheat to points near the United States boundary and then hauling it in wagons across the line to secure higher prices. However, neither the government nor the wheat board had heard any more than rumors of such action, and therefore could not hold these farmers to account for anything they had received above the board's fixed prices for wheat. The holders of participation certificates, Mr. MacNutt was informed, would not receive any allowance to compensate them for the reflection in value of such certificates by reason of reduced prices for seed wheat, allowed on compassionate grounds to farmers in dried-out areas.

## Cost of Hudson Bay Road

**Over Three Hundred Miles of Steel Have Been Laid On The Line**

Ottawa.—In reply to Mr. Campbell in the house, the minister of railways said that 322 miles of steel had been laid on the Hudson Bay Railway. There were 92 miles still to be laid. The total expenditures of the railway at the end of the last fiscal year was \$13,890,387 and on the terminals \$6,344,499.

The estimated cost of completing the track-lying into Port Nelson was \$17,500,000, but to complete the railway would require \$4,000,000.

**Signals From Mars**  
Paris.—Belief that the strange signals picked up by wireless stations recently came from the planet Mars, is expressed by Camille Flammarion, the famous astronomer. He thinks inter-stellar communication may yet become a realized fact, but he is inclined to believe it will be accomplished by the use of some magnetic force which is not as yet developed.

## Urges Completion Of Hudson Bay Road

**Minister of Railways Promised Western Members That Matter Would Be Discussed**

Ottawa.—Arguing that if the government could set aside \$5,000,000 for the construction of the Welland Canal, it can at least set aside \$2,000,000 for the completion of the Hudson Bay Railway, a score or more of western members held a conference with Hon. J. D. Reid, minister of railways, and Hon. A. L. Sifton, secretary of state. While little hope was held out that the wish of the delegation would be met this year, the minister of railways said canals promised to bring the matter up in the house for a full and frank discussion on the relative merits of both propositions named. The delegation again urged that the Hudson Bay road was a national project and should be treated entirely as such.

In reply to an argument by the minister that the Welland Canal was deteriorating because of non-completion, the delegates pointed out that exactly the same argument applied to their project. It was also pointed out that \$777,000 had been set aside for the Welland Canal scheme, which project the delegation claimed as merely a "pleasure ditch."

Going back to the Welland Canal argument, it was contended that this scheme would not be of any real use until the St. Lawrence canal scheme was finished, and as yet it had not got past the survey stage.

## Settlement of Palestine

**Jews and Arabs to Co-operate in Restoration of the Holy Land**

New York.—Speedy settlement of political difficulties in Palestine by co-operation of Jews and Arabs, in restoration of the Holy Land is expected as the result of the Palestine Jewry's request for Arab aid, according to an announcement here by the Zionist organization of America. The organization received a despatch from the Zionist commission in Palestine stating that Vaad Hamaamad, the representative body of Palestine Jewry, had issued a manifesto to the Arabs explaining that Zionist aspirations in the Holy Land "will not exploit or injure the Arabs or the population. But will prove of mutual benefit to all."

## Fast Time Again

**Confusion Said to Result From Adoption of Summer Time**

Toronto.—There is considerable confusion in Canadian border cities and towns, and generally throughout Canada in industries having direct connections with the railway, following daylight saving time being inaugurated in New York and other border states. The mix-up will probably continue, more or less, during the month of April.

On May 2, the cities of Montreal, Toronto and Ottawa will adopt the daylight saving time locally. Niagara Falls, Ont., and other frontier points are running on the new time already. It is not expected that the federal or any of the provincial governments of Canada will take up daylight saving this year as a Dominion or provincial measure. The railways have so far made no definite move in the matter.

## Turks Destroy Railway Bridge

Constantinople.—The Nationalists have destroyed an important railway bridge at Bilejik, on the line between Constantinople and Aleppo. The British are now restoring it. The destruction of the bridge isolated a small detachment of Punjab, but it is expected they will come out safely in a few days.

## Lebanon Declares Independence

Washington.—Lebanon, in Asiatic Turkey, has declared its independence of Prince Faisal's government. The state department was advised by the United States consulate at Beirut. A flag similar to the French tricolor, but with the Cedar prominently displayed was chosen and a constitution is being drawn up.

## Big Increase in Customs

Ottawa.—An increase of more than \$10,000,000 in customs revenues over last year is reported by J. H. Bertram, collector of customs for this city, in a report covering the year just ended.

## Hoover for President

San Francisco.—Herbert Hoover has telegraphed to the Hoover Republican club of California that he would accept the Republican nomination for President "if it is felt that the issues necessitate it and it is demanded of me."

## Holland Retains Ex-Kaiser

**Reply With Regard to Former German Emperor Agreed to By Allies**

London.—The allied powers have accepted Holland's last note regarding the former German emperor, according to an Amsterdam despatch to the Daily Mail.

The Dutch government on March 3, for the second time refused to deliver the former German emperor to the allies for trial. This determination was set forth in a note to the British premier, who, however, declared the Dutch government would take all necessary measures to migrate the liberty of Wilhelm and prevent him from endangering the peace of the world.

The communication stated that precautions to this end would be taken "on the spot." It was assumed that this meant a close guard over the former Kaiser and a strict censorship would be instituted while Wilhelm occupied his estate at Doorn.

## To Help Convicted Men

**Winnipeg Labor Men to Discuss Means of Releasing Strike Leaders**

Winnipeg.—More than 700 delegates, representing Winnipeg labor organizations, will meet April 11 to discuss ways and means to effect the release of convicted strike leaders, James Law, secretary of the defence committee, announced.

It is possible that representations of labor organizations from other cities and towns, both east and west, will attend the convention, Mr. Law said. Many enquiries have been received from outside points as to what the committee intends to do.

The defence committee are now caring for the dependents of the convicted leaders. These dependents total 29.

## Shorter Hours for Nurses

Winnipeg.—An eight-hour day, 56 hour week, has been instituted for the nurses in training at the General hospital. This is the first of the reforms in the training school, and will later if possible, include an afternoon a week off. There is a shortage of applicants for training for nurses and those in charge are planning to make conditions of training more attractive as a step in the campaign for students.

## Fast Time Again

**Confusion Said to Result From Adoption of Summer Time**

Toronto.—There is considerable confusion in Canadian border cities and towns, and generally throughout Canada in industries having direct connections with the railway, following daylight saving time being inaugurated in New York and other border states. The mix-up will probably continue, more or less, during the month of April.

On May 2, the cities of Montreal, Toronto and Ottawa will adopt the daylight saving time locally. Niagara Falls, Ont., and other frontier points are running on the new time already. It is not expected that the federal or any of the provincial governments of Canada will take up daylight saving this year as a Dominion or provincial measure. The railways have so far made no definite move in the matter.

## Turks Destroy Railway Bridge

Constantinople.—The Nationalists have destroyed an important railway bridge at Bilejik, on the line between Constantinople and Aleppo. The British are now restoring it. The destruction of the bridge isolated a small detachment of Punjab, but it is expected they will come out safely in a few days.

## Lebanon Declares Independence

Washington.—Lebanon, in Asiatic Turkey, has declared its independence of Prince Faisal's government. The state department was advised by the United States consulate at Beirut. A flag similar to the French tricolor, but with the Cedar prominently displayed was chosen and a constitution is being drawn up.

## Big Increase in Customs

W. N. U. 1310

# Will Declare State of War To Be at End

## Price of Flour May Advance

**Action of Wheat Board in Continuing Restriction Is Said to Be The Reason**

Ottawa.—A material advance in the price of flour is indicated in an announcement made here on behalf of Canadian millers by George A. McDonald, representing the Quaker Oats Company and head of a delegation of representative millers which waited on the government to discuss the serious situation which Canadian millers are facing as a result of the action of the Canadian wheat board in continuing the restriction in the price of flour on the Canadian market, and the lack of export markets for Canadian flour.

The increase will be necessary to meet the increased cost of manufacture. The scarcity of mill feeds in Canada is directly traceable to the lack of a market for flour and to consequent decrease in the volume of domestic milling, the millers stated. They have asked the government to modify the regulations of the wheat board and to co-operate with the millers in inducing foreign buyers to take a reasonable proportion of Canadian wheat flour rather than wheat. Various quantities of flour are said to be available in the United States for export and this complicates the Canadian problem.

It is said that more than 4,000 men already have been thrown out of employment by the forced closing down of some of the mills of which there are about 500 in Canada.

## Germany Will Behave

**Promises France to Live Up to Terms Of Treaty in Regard to Ruhr District**

Paris.—Assurances have been given by the German government that it will not send into the Ruhr valley more regular troops than are allowed and declared no more such troops would be sent there without authorization from the allies.

Receiving members of the French press, M. Millerand declared that if the Germans violated the terms of the treaty by sending a strong armed force into the Ruhr district, France would occupy part of the neutral zone whether the allies agreed or not.

## Mayor of Cork

Cork.—At a special meeting of the Cork corporation Alderman MacSweeney was elected Lord Mayor. He is a Sinn Féin leader and several times has been deported or imprisoned.

# Big Deficit On National Railways Is Announced

Ottawa.—In a comprehensive speech, Dr. Reid, minister of railways laid before the house the first annual budget of the government railway system since its inauguration. His statement has been daily waited and was followed with interest by all sides of the house.

He gave in detail the financial result of the year's operations, outlined the needs of the road in the future; stated their program for the coming year. It discussed the vital question of the suggested increase in freight rates. The year's work showed an operating deficit on government roads of \$14,000,000, namely: Canadian Northern, \$6,500,000; I.C.R. and Transcontinental, \$7,500,000. To this there has been added \$19,000,000 for fixed charges on a total deficit for the year (including fixed charges) of \$33,000,000.

In comparison the operating deficit of the roads in 1918 (the Canadian Northern was then in private hands) was \$21,184,000.

Revenue, too, had advanced nearly \$12,000,000. But so Dr. Reid explained to the house, operating expenses had increased from \$84,000,000 to practically \$108,000,000. The advance in operating expenses were largely due to increases in wages granted under the McAdoo award.

In all this, however, Dr. Reid did not take the Grand Trunk Pacific (of which the government is in possession)

## Washington—Peace with Germany

by adoption of a joint resolution declaring the war at an end, was put squarely before congress by representatives in control of the house. Framed by Republican members of the foreign affairs committee and by party leaders, the measure was thrown in the hopper with as little ceremony as if it had been a bridge bill, but instantly there developed a demand for speedy action. A move to jam it through the house took shape, but Democrats, outpoken in their opposition, finally obtained an agreement to postpone consideration.

While trying to work a resolution calculated to suit all factions of their party, Republican committee men had arranged to call it up immediately. The resolution introduced by chairman Foster, of the foreign affairs committee, pressed for termination of a state of war as soon as it becomes effective. It provides also for reciprocal trading with Germany under certain reservations and for a repeal of the president's war powers. Germany would be allowed 45 days to notify the president that it has declared a termination of war and waived all claims against the United States, "that it would not have had the right to assert had the United States ratified the Treaty of Versailles."

Upon Germany's failure to send such notification, trading, or the making of loans or credits would be prohibited except with the license of the president.

Republican members of the foreign affairs committee, to which the resolution was referred without comment, worked in conference for more than five hours before they mapped out a measure designed to overcome all party objections. The committee is expected to report to the house. After chairman Campbell, of the rules committee, had announced that the resolution would be taken up immediately, with four hours set aside for debate, Democrats objected and asked for more time in which to study and digest the full text.

This resulted in a hasty conference between Republican steering committees and minority leaders, it finally being agreed to defer consideration for a few days.

## Grand Duches Olga to Reside In Denmark

Constantinople.—The Grand Duchess Olga of Russia, sister of former Emperor Nicholas of Russia has left for Serbia, en route to Denmark, where she will reside permanently. She still firmly believes her brother and his family are alive.

## Big Deficit On National Railways Is Announced

Ottawa.—In a comprehensive speech, Dr. Reid, minister of railways laid before the house the first annual budget of the government railway system since its inauguration. His statement has been daily waited and was followed with interest by all sides of the house.

He gave in detail the financial result of the year's operations, outlined the needs of the road in the future; stated their program for the coming year. It discussed the vital question of the suggested increase in freight rates. The year's work showed an operating deficit on government roads of \$14,000,000, namely: Canadian Northern, \$6,500,000; I.C.R. and Transcontinental, \$7,500,000. To this there has been added \$19,000,000 for fixed charges on a total deficit for the year (including fixed charges) of \$33,000,000.

William H. Willson, Secretary (Desk A), Calgary, Alberta

**BAR U AND NAMAKA FARM PERCHERONS**  
The largest stud of the Percheron in the world. The first Percheron breeding farm established in Canada. The only farm on the American continent from which British horses have selected Percheron breeding stock to establish studs in Britain.  
Do not let the British breeders come to Canada and carry off all our best foundation stock. Do not be satisfied with the cheap stallions brought to us by irresponsible dealers and stallion peddlers from the United States, when you can buy the best individuals of the best breeding stock right here in Alberta by men that have been in the breeding business for 25 years, and expect to remain in the business. We have developed the best Percheron stallions of our own blood. We have a large number of stallions to select from. You can see these stallions and dams, and if you cannot choose one from the lot to suit you, we will give you a Percheron stallion of your choice for price or come to Calgary, Alberta, and we will meet you and show you the stock at any time.  
**GEORGE LANE (Desk B), CALGARY, ALBERTA**

## Wantmore Peanut Candy

Boil three cups of sugar in one cup of water until it hardens, when dropped into water, flavor with lemon, then add one-half cup of Waterbury's Blended Salted Peanuts chopped fine. Stir well. Have ready a hot dish or pan freely buttered, and pour candy in. Spread over enough surface to make a thin candy. Be sure and use Fowler's Waterbury's Salted Peanuts, as no other peanuts will make it as good.

## Allies Borrowing From Argentine

**Britain, France and Italy Share Loan**  
**For Wheat Purchase**  
Announcement that negotiations for Argentina's loan of \$200,000,000, to Great Britain, France and Italy had been completed was made yesterday by Carlos A. Tornquist, high commissioner of finance of Argentina, on his arrival from Europe on the steamer Lapland.  
Great Britain and France each received 40 per cent, and Italy 20 per cent. of the loan, which, he said, is for the purpose of financing purchases of wheat, beef and other foodstuffs in the South American country.

**British Bullion Reaches America**  
Gold bullion valued at two millions pounds sterling, to be used in paying interest on Anglo-French bonds due next October, arrived in New York on the steamer Lapland. The consignment, the first to be sent here from Great Britain for this purpose, it was said, was consigned to J. P. Morgan and Company.

## Will Morning Never Come

DOES this illustration picture your experience?

What is more distressing than being unable to sleep? Sleeplessness is one of the first and most certain symptoms of exhausted nerves.

This is the warning that you need the assistance of Dr. Chase's Nerve Food to restore vigor to the nervous cells and thereby avoid the development of serious nervous trouble.

By improving the quality of the blood and building up the nervous system this food cure brings new energy and strength to the whole body.

50 cents a box, 6 for \$2.75. All dealers, or direct from Dr. Chase, 1115 Broadway, New York, N.Y.

**Dr. Chase's Nerve Food**

**Manitoba to Improve Roads**  
The province of Manitoba is to spend \$5,000,000 on road improvement this year. The bulk of this will go for the grading of 800 miles of road. When this is completed the province will have 2,000 miles of graded roads, mostly gravelled. A large number of concrete bridges are to be built. All the work will be done by contract under the supervision of the government.

## GRUMPY?

If Constipated, Bilious or Headachy, take "Cascarets"

Brain foggy? Blue devils got you? Don't stay sick, bilious, headachy, constipated. Remove the liver and bowels, which is keeping you headachy, your tongue coated, your breath bad, and stomach sour. Why not spend a few cents for a box of Cascarets and enjoy the nicest, gentlest laxative-cathartic you ever experienced? Cascarets never grip, sicken or inconvenience one like Salts, Oil, Calomel or Harsh Pills. They work while you sleep.

## Telephone System Being Extended

Are 11,000 Phones in Farm Homes in Alberta  
According to the deputy minister of railways and telephones of the provincial government, there are 11,000 telephones in farm homes in Alberta.

It is the aim of the government to place an automatic phone in the home of every subscriber. The government has adopted the policy of extending the system as soon as possible to districts where the service does not now exist.

In pursuance of this policy an ambitious plan of development is being followed this year. Miles of construction work is being undertaken for which the government has ordered 250,000 telephone poles, one and a half million pounds of copper wire, and about four million pounds of iron wire.

During the past year over two million long distance calls were handled by the system.

## Motor Cars in Canada

One in Every Twenty-three Persons in Canada Own a Motor

There are 6,000,000 automobiles in the United States or one to every twenty inhabitants. In England there are only 180,000 cars, or one to every 468 persons. There is one automobile to every 402 people in France, to 684 people in Germany, to 1,000 people in Italy, to 2,700 people in Austria, to 3,300 in Russia.

Registration of cars in Canada increased 13 per cent. over that of 1918. Ontario continues to be the banner province for automobiles, with 127,360 passenger cars, and 11,423 motor trucks in use, with Saskatchewan, Alberta, Manitoba and Quebec following in order. The rural population owns more than half the cars in the Dominion and in the prairie provinces the percentage is higher.

Canada is no longer an assembling centre for automobile parts made in the United States. The made in Canada automobile is now a reality.

## British Won In Espionage Game

**Counter System Completely Paralyzed**  
**Han Spies in England**  
The London Morning Post published, recently, an interesting record of Germany's spy system and Great Britain's counter-espionage organization which was so efficient by the summer of 1915 that seven German spies were taken in one fortnight, paralyzing Germany's schemes to re-establish her spy service in Great Britain. A feather in the cap of the British organization, was the capture of two Dutchmen named Janssen and Roos. Suspicion was aroused concerning them on account of numerous telegrams they despatched from naval ports to The Hague, apparently ordering cigars. This was remarkable as sailors are not in the habit of ordering cigars, so the senders were arrested. Janssen and Roos, when examined, claimed to be travelers on behalf of the Dieker company of The Hague. Under further examination they gave contradictory explanations, and the prosecution showed that the address of the Dieker company was the same as the headquarters of the German secret service in Holland. Next day Roos' endeavor to commit suicide by cutting his manacled wrists on the broken glass of a door. The cigar case was found to refer to naval secrets. Habas means light cruises and Coronas battleships. Janssen and Roos were convicted and shot on a miniature rifle range in the grounds of the Tower. They faced the firing parties with bravery. Neutral spies from Holland and elsewhere learned that an espionage mission in England was attended with the greatest difficulties. Thenceforward Germany only sent casual spies, who pretended to be commercial travelers, and tried to get away before their movements aroused suspicion.

**Former Emperor Starts Moving**  
Part of former Emperor William's personal luggage has been moved from Benthick Castle, where he is living at present to Doorn, where he is soon to take up his residence. A large number of trunks, most of which had not been opened since the former emperor's arrival here, have been taken to Doorn in motor trucks. Moving day for Count Hohenzollern is expected to be May 1.

## SPRING IMPURITIES MEAN WEAK BLOOD

**A Tonic Medicine Is A Necessity At This Season**  
Dr. Williams' Pink Pills are an all year round tonic blood builder and nerve strengthener. But they are especially valuable in the spring when the system is clogged with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching. In the spring one feels weak and tired and the appetite, tone the stomach and weak digestion. It is in the spring that poisons in the blood most often find an outlet in skin eruptions, pimples, eruptions and boils. Dr. Williams' Pink Pills clearly the skin because they go to the root of the trouble in the blood. In spring anemia, indigestion, neuralgia, rheumatism, and other troubles are persistent because of weak, watery blood and it is at this time when a tonic medicine is most needed. The blood most seriously needs attention. Among those who have proved the value of Dr. Williams' Pink Pills are Mr. Archie D. Carmichael, Tarbot, N.S., who says: "For a number of years I was bothered with indigestion, which would break out on my face and body. The trouble was always worse in the spring and autumn. I tried different treatments, it was without much success. In the spring of two years ago I bought a box of Dr. Williams' Pink Pills and although I was taking medicine it did not help me until I finally decided to stop other medicine and take these pills. The pimples disappeared, and there has since been absolutely no more trouble." Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

## Minard's Liniment Cures Drafts.

**Beak Propped**  
"Two bags and a labbox," said the tourist who was travelling for the first time in Scotland, on arriving at a little wayside station. The porter minutely collected the articles and put them on board a cab. "And, by the way, porter," said the passenger, "what do they usually give you here for a tip?" The porter jerked his thumb over his shoulder. "See you big house in among the trees?" he asked. "Yes, but what has that to do with it?" "Well, that's the workhouse, and it's fit 'o' old railway porters," Argonaut.

## She Tells Just Why They Are So Popular

**MRS. OAKES SPEAKS IN PRAISE OF DODD'S KIDNEY PILLS**

She had severe backache before using Dodd's Kidney Pills, but now she says she is quite well again.

"Among the women in this section who are shouting the praises of Dodd's Kidney Pills is Mrs. John Oakes, one of our highly respected residents. Nor does Mrs. Oakes fail to give the reason.

"Before using Dodd's Kidney Pills," she states, "I suffered with severe backaches. Now I am quite well again."

"I am highly pleased with Dodd's Kidney Pills. They have given me the best of satisfaction. In these last two sentences Mrs. Oakes gives the reason why Dodd's Kidney Pills are so universally popular with the women of Canada. They give satisfaction. Women in all parts of Canada are every day stating that they suffered from kidney ills and found relief in Dodd's Kidney Pills. If you haven't used Dodd's Kidney Pills ask your neighbors about them. They have been in use in Canada for more than a quarter of a century and have earned a place in the family medicine chest almost everywhere."

**General Botha As Campaigner**  
During the Boer War He Used No Maps  
How General Botha, one of the South African bulwarks of the British Empire during the world war, carried on his campaign against Great Britain during the Boer War, is told by The Contemporary Review. "During the Boer war he used no maps. He worked entirely by rote, by swift calculations, by keenness of eye, by knowledge of the country, by rapid perception of the lie of the land, and of the difference between dry and wet land, marching places and halting places, and so forth. Yet his calculations were extraordinarily sound. One of his aides-de-camp said that Botha had only once been caught out, and that was when he allowed his own judgment to be out-weighted by that of his staff."

## Dairying in Manitoba

**Value of Dairy Products For the Year**  
Amounted to \$16,789,892.51  
Manitoba has forty-four creameries, with 22,000 milk and cream shippers, and present indications for increased production of dairy products in the province are exceedingly encouraging. During the year 1919 a number of new silos were erected at different parts of the province. These have been filled with corn, green oats, and peas, which makes a succulent and good cheap feed for milk cows. The total value of dairy products for the year amounted to \$16,789,892.51. The increased production, combined with the increased price, amounted to \$5,001,719.25. The increase in dairying is more noticeable in the Southern part of the province, where grain growing has been carried on for 25 or 30 years. There appears to be a marked change towards more mixed farming in this part of Manitoba.

**Former Emperor Starts Moving**  
Part of former Emperor William's personal luggage has been moved from Benthick Castle, where he is living at present to Doorn, where he is soon to take up his residence. A large number of trunks, most of which had not been opened since the former emperor's arrival here, have been taken to Doorn in motor trucks. Moving day for Count Hohenzollern is expected to be May 1.

## Seedling Prospects Fair

**Good Supply of Wheat, Oats and Barley Seed in West**

Ottawa—Seedling prospects in the prairie provinces are very fair as far as can be judged at this early date, it is stated in reports to the department of agriculture. There is a good supply of wheat, oats and barley seed in the west. It is fairly well distributed and in good condition. Good fall rains were reported from most districts, and nowhere is anticipated that there will be insufficient moisture for germination. Some districts are fairly dry and depend for their crops on weather conditions early in the season. In giving out these details, Dr. J. H. Criddle, deputy minister of agriculture, stated that no difficulty is anticipated in distributing seed. There is sufficient to meet every demand and it will be available where it is required. Crop prospects throughout the Dominion are apparently good at this date.

**Catarah Cannot be Cured**  
BY LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarah is a local disease, greatly influenced by constitutional conditions. HALL'S CATARAH MEDICINE will cure catarah. It is taken internally and acts on the mucous membrane of the surface of the eye. HALL'S CATARAH MEDICINE is composed of some of the best tonic known, combined with the most powerful and penetrating of the perfect combination of the ingredients in HALL'S CATARAH MEDICINE what produces such wonderful results in catarah.

**Dairy Business Increases**  
Swift Current Increases Output By Over Six Hundred Per

The Swift Current plant of the Saskatchewan Creamery Company reports an increase of over six hundred per cent. in the business done during the first ten weeks of this year, as compared with that of the corresponding period in 1919. This showing is all the more remarkable since Swift Current is in the heart of the so-called "dry area" of Saskatchewan, where during the past year the wheat crop was much below normal. It is accepted as evidence that while lack of rain may seriously affect grain crops, it has no apparent effect on the dairy industry. The butter output of the Swift Current plant in 1919 was 199,054 pounds, according to figures received at the dairy branch of the provincial department of agriculture.

This creamery is a branch plant of the Saskatchewan Creamery Company which has other branch plants in various parts of the province. Since January first the total output of all branches shows an increase of approximately fifty per cent. over the corresponding period last year. The faith which the company has in the future of dairying in the southern and western portions of Saskatchewan is evidenced by the fact that they are erecting new plants this year at Weyburn and Maple Creek.

"The idea of dairying at Maple Creek five years ago was a joke," says an official of the dairy branch. "These results, accomplished in dry years, only go to show the possibilities of the dairy industry in this province under normal conditions."

A will written on a table cloth was refused probate in San Francisco because Mrs. Helen Scott, who wrote it just before she died, forgot to put a date on it.

**Minard's Liniment for sale everywhere.**  
An oyster attains its full growth in about three years.

**Gold Prospects For Crop**  
"I consider the prospects for the coming season on the land are the best in several years," states F. W. Crandall, of Calgary, the largest individual farmer in Alberta.

Mrs. Crandall states that he expects to crop about 10,000 acres this year. The moisture conditions, he says, are ideal. There has been a heavy fall of snow, which has gone off gradually, furnishing moisture to the soil.

This opinion is shared by experienced farmers from all parts of the province, and all indications point to a heavy crop this season.

The art of cameo cutting was brought to a high stage of perfection by the early Greeks.

**HOW TO "BE FIT" AT SIXTY**  
BY DR. LEE HERBERT SMITH.

As our boys "came marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit," even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly fag, has meager appetite, headaches, nerves unstrung, is gloomy, ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up" exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally castor oil or a pleasant laxative made up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The exertion of uric acid we are able to effect by exciting diuresis." Drink copiously of soft rain or distilled water, six or eight glasses per day, hot water before meals, and obtain **Aturic Tablets**, double strength, for 50 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

"Anuric" (anti-uric-acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

Well-known Alberta  
Alumnus Dies

The Alumni of the University of Alberta will learn with regret that Cameron A. Buck, B. Sc., '16, died from pneumonia on Saturday, March 20th. During his University course Mr. Buck took a keen interest in all side of student life, and in addition to winning the Applied Science Scholarship in his sophomore year, also officiated as manager of the Rugby team which won the Provincial Championship, 1915. After graduation he was engaged in munition work in Eastern Canada, and then for one year served overseas as an officer in the Canadian Engineers since returning from overseas, Mr. Buck had been employed with the Black Lake Asbestos and Chroma Co., Limited, Black Lake, Que.

President Wilson and  
the league of Nations

The people of Canada are deeply interested in the controversy at present raging in the United States concerning the part played by President Wilson in world politics, especially in connection with the Peace Conference and the League of Nations.

How widely divergent are the opinions held by Americans is strikingly illustrated in the March issue of *World's Work*, which contains two articles by Americans, which are summarized on the outer cover under the titles, "Wilson, the Successor" and "Wilson the Failure."

In the first of these articles, William E. Dodd, formerly Professor of American History in the University of Chicago, maintains that the final compromise is a noble plan which is being mutilated by materialistic opponents at home and abroad.

The second article is written by W. M. Fullerton, author of "Problems of Power" and other books, and a lifelong student of international relations. His conclusion is that President Wilson's efforts have resulted in the Balkanization of a large section of Europe, the utter bewilderment of America, and his own repudiation at the hands of the American people.

## A Successful Canvasser

In a manufacturing town in Ontario a canvasser for the Forward Movement tackled a chap in one of the factories, and the following dialogue ensued:

Canvasser: "Say, how much are you going to give to the Forward Movement?"

Factory Hand: "I'll not give you a cent."

Canvasser: "Look here! You have several children, haven't you?"

Factory Hand: "Yes, I have."

Canvasser: "Well, suppose something should happen to you, who in hell is going to pay for the religious instruction of your children? Do you expect me to do it? If so, you are making a damn big mistake."

The canvasser turned on his heel and was walking out when the factory hand called him back and signed his name for \$25. He was converted by the lucidity and logic of the canvasser's argument.

Prohibition is  
Farce in East

Toronto March 28—Arthur S. Wallace, associate editor of the *Manchester Guardian*, who is making a five weeks' tour of Canada, preparatory to the publication of a Canadian number of the *Guardian*, in an interview here, said with reference to prohibition:

"So far as I can see east of Toronto, prohibition is farcical. I went across to Hull when I was in Ottawa and believe me, I found in the shops of even the small liquor vendors there, samples of more varieties of Scotch liquor than could be found in the big shops in England or Scotland."

A local woman the other day remarked that she felt lost without the use of her tongue. We sympathized with her by remarking that what was left of a poor woman who had lost her tongue wasn't worth worrying about.

There're lots of guys who would like to be stool-pigeons or spotters for the attorney-general's department, in the enforcement of the liquor act, but they fail to qualify on account of not knowing well enough the smell and taste of the vile stuff.

England's tobacco bill for the year is in excess of two hundred and fifty million dollars.

Proposed Good  
Roads For Alberta

OTTAWA, April 3.—A. W. Campbell, federal commissioner for highways, has before him the roads that the Albert government term, main highways upon which the federal appropriation for the next five years is to be spent in the maintenance and improvement.

A map furnished by the Albert public works department shows that there will be a north and south highway from County to Peace River crossing, Ootula to Lethbridge to Macleod and then straight north. There are three other routes of importance to the south, viz., Medicine Hat via through Lethbridge, Macleod, Pincher Creek, Blairmore, linking up at Crow's Nest with the R. C. system; (2) Medicine Hat west to Calgary and (3) Pincher Creek south to Waterton Lakes. These highways are already in existence as provincial main roads, and it is only upon them that the federal appropriation can be expended. The federal commissioner then thinks it possible that with the federal assistance, the province may be able to surface many of these highways with gravel.

Although in Alberta there are about half a dozen east and west highways that will receive federal aid. In the north one of these runs from the Saskatchewan boundary through Edmonton to Jasper Park.

## The Rainbow's Sound

Incredible as it may seem, a beam of light can be made to produce sound. A ray of sunshine is thrown through a lens on to a glass vessel containing lampblack colored silk or worsted, on any like substance. A diaphragm with slits or openings cut into it is made to revolve swiftly in this beam of light, so as to "cut it up," thus causing alternate flashes of light and shadow. When one places his ear to the glass vessel he hears strange sounds so long as the flashing beam falls upon the vessel.

A still more extraordinary effect is produced when the beam of sunlight is made to pass through a prism so as to produce what is called the solar spectrum. The disk is turned and the colored light of the rainbow is made to break through it. Now if the ear be placed to the vessel containing the silk or other material, as the colored lights of the spectrum fall upon it, sounds will be given out by the different parts of the spectrum, and there will be silence in other parts.

For instance, if the vessel contains red worsted and the green light flashed upon it loud sounds will be given forth. Only feeble sounds will be heard when the red and the blue parts of the rainbow fall upon the disk. Other colors, when introduced no sound at all. Green silk gives out sound best in a red light. Every kind of material gives more or less sound in different colors and no sound at all in others.

Geologist on the  
Age of the Earth

Says World Was Eons Old Before Man Appeared

A geologist, writing: the Scientific American, describes by means of a graphic chart the comparative lengths, different periods of age of the earth. The writer's object is, apparently, to convey an idea of the insignificance of human affairs viewed from the standpoint of time. To this end he places the eye of the earth arbitrarily at 72,000,000 years represented by a clock dial of 24 hours—3,000,000 years to each hour.

On this basis the first six hours of the clock represents Azoic time, the earliest conjectural period of the earth's formation—18,000,000 years the next six hours Eozoic, and the next eight hours Paleozoic time—18,000,000 and 24,000,000 years, respectively—periods of mineral and vegetable formation. In the next three hours animal life developed—Mesozoic time, 9,000,000 years—that is, from the 20th to the 23rd hour. Thus, last hour of the 24, 3,000,000 years of geologic time—represents Neozoic time, which includes the appearance of human life in the Quaternary period.

It then appears that this last division of the 24 hours, the Quaternary period, is shown as only 19 minutes—in other words, 500,000 years, therefore, bears the same relation to the age of the earth, as 10 minutes does to 24 hours. But since the period of written history is estimated roughly at only 6,000 years, this last division would hardly show on the chart, since it would only be 12 seconds in duration.

## IN MEMORIAM

In loving memory of Private Spurgeon McGary, killed in action on April 9, 1917, at Vimy Ridge.

Three years have passed, and still we miss him.

'Tis hard to break the tender bond.  
When love has bound the heart, 'tis hard,  
So hard to speak the word.

Dearest loved one, they have laid thee  
In the land so far away.

But thy memory will be cherished  
When we gaze on this great day.

Inserted by his Wife and Children.

to file your

Income Tax Return  
on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.
2. All other individuals who during the calendar year 1919 received or earned \$2,000 or more.
3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing  
returns on or before  
the 30th of April, 1920.

ALL INDIVIDUALS other than farmers and ranchers must use Form T 1.

FARMERS AND RANCHERS must use Form T 1A.

CORPORATIONS and joint stock companies must use Form T 2.

## Penalty

Every person required to make a return, who fails to do so within the time limit, shall be subject to a penalty of Twenty-five per centum of the amount of the tax payable.

Any person, whether taxable, or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$10,000, or to six months' imprisonment or to both fine and imprisonment.

2

## General Instructions.

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation or from Postmasters.

Read carefully all instructions on Form before filling it in.

Prepay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly and avoid penalties.

Address INSPECTOR OF TAXATION, CALGARY, ALTA.

R. W. BREADNER, Commissioner of Taxation.

Why the Sympathetic  
Strike Fails

A protesting telegram, sent by Daniel J. Tobin, president of the International Teamsters and Chauffeurs Union, lately sets forth the injustice of the sympathetic strike and its evil results to organized labor. Informed that a general strike involving sixteen or eighteen union organizations was pending in Wheeling, W. Va., President Tobin telegraphed from Indianapolis:

"In behalf of the international organization of teamsters and chauffeurs I, as general president, desire to say that I am emphatically opposed to any general sympathetic strike or stoppage of work in behalf of striking teamsters. In the history of all general sympathetic strikes in this country such strikes have been absolute failures. It is unjust to punish fair employers of labor in order to get square with an unjust employer."

President Tobin refused to sanction the sympathetic strike, even though it was proposed in the district of one of his own unions. He speaks of the injustice

of the sympathetic strike to fair employers, but there is another element of injustice—the wrong done the labor unions by involving them in a strike that not only puts their members in idleness, but requires them to break their agreements; and the wrong done the general public, which always suffers severely in extensive sympathetic strikes. President Tobin is right. The sympathetic strike is un-British and unfair—a species of tyranny that the public finds unbearable. It is against public policy and always results, wherever and whenever attempted, upon organized labor.

## A Big Western Problem

It is, of course, merely a trite observation, and a statement of what everybody knows, to declare that the Western Prairie Provinces of Canada have many difficult problems to solve in order to promote their maximum growth in population, wealth and general development. Neither time nor space would permit of even a mere recapitulation of these varied and complex problems, not to speak of an intelligent consideration of even a few of them.

Asked to name the first and foremost question demanding attention by the people of the West, would, no doubt, be as varied as the problems themselves. Some would say a larger population in order to develop the country, increase their production, and assist to bear the expense of the public services. Others would urge full provincial control of the natural resources in order that they might be developed for use. Others, again, would lay emphasis upon the assimilation of the foreign-born into a broad and true Canadian citizenship. Better schools and a more general education for all classes would be advocated. Some would say tariff reform, or cheaper money, were the main essentials to a betterment of conditions; while others, again, would lay stress upon social, moral and religious issues. Some practical minds would say more branch lines of railways, better roads, and a general improvement in all means of transportation.

And to a greater or less degree all these things are necessary to the welfare, growth and prosperity of the Prairie Provinces. There can be no question about that. But at the present time there looms up a problem, the solution of which would first appear to be necessary without loss of time if many of these other questions are to be satisfactorily settled. And in some respects it is the most difficult of all our problems.

We refer to the need of solving the difficulties, we might almost say the disastrous conditions, confronting thousands of settlers by reason of the drought which has afflicted sections of the West during the last three years. So long as these conditions continue a black eye is given to immigration to this country because the bad advertisement thus given western Canada abroad has an adverse effect on the securing of that larger population we need and must have. It affects the credit of our people, stags railway development, cripples business and imposes heavy burdens upon municipalities and governments. Something better than the provision of temporary relief to the direct sufferers must be found.

Those who are perhaps best qualified to judge, believe the only solution is to be found in a radical change in farming methods in these districts, and the substitution of other crops, in part at least, for the all grain crops

which have, for the most part, been attempted in the past. It is asserted that even in these drought stricken areas, a few farmers have been able to succeed, where the majority have failed, by reason of the fact that they followed other methods.

In the years of drought, there was not only failure of grain crops, but also of grass, with the result that there was neither food for man nor feed for stock. On the other hand, some farmers were successful even in these years of lack of moisture in raising green corn and other kinds of feed for stock, even the grasses failed. What they succeeded in doing, their neighbors could also do. It is suggested, therefore, and wisely it would seem, that steps should be taken to bring the actual experience of these men, and the methods followed by them, to the knowledge of the people generally in the districts referred to, not by books or pamphlets, but by these men telling the story of their experiences and success to groups of farmers throughout these areas.

It is also being urged that the combined knowledge of the agricultural experts of the country should be brought to bear in an effort to solve this problem.

These experts and scientific agriculturists on experimental farms and elsewhere have evolved earlier ripening varieties of grain in order to escape the loss occasioned by frosts. Along this line they have met with splendid success and the loss from frost, which formerly was a constant dread of the farmer, elsewhere has been almost entirely decreased. Has the time not arrived when the energies of all these men should be turned into the channel of endeavoring to evolve a drought-resisting variety of wheat and other grains?

There are countries even more seriously affected with drought than western Canada, which, nevertheless, are succeeding agriculturally. Surely from these lands varieties of grains can be secured to be tested experimentally here.

Something must be done, and done soon, to create new conditions in the areas referred to, or else they will have to be abandoned as unfitted for agricultural settlement, with all that will mean, not only in individual loss to the people there, but to the whole country. It is the only way of escaping the disaster which "next year" will yield a crop, and in the event of disappointment reliance upon the government for food, fuel, clothing and next season's seed, and the removal of stock to greener pastures. The country has almost reached the end of this unsatisfactory policy; something more permanent, more constructive, that will put new hope into men's hearts, must be forthcoming.

## Old Garments, New When Diamond Dyed

Shabbily, Faded, Old Apparel Turns Fresh and Colorful

Don't worry about perfect results. Use "Diamond Dye," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods. — dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything.

The Direction Book with each package tells how to Diamond Dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

**Completing Hudson Bay Line**  
The Winnipeg board of trade has been notified by the federal government that it will cost \$400,000 to complete the Hudson Bay Railway. Up to the present, 332 miles of the line have been built and about 90 miles of track are still required to bring the road to its ocean terminus at Port Nelson. The Dominion government is not yet in a position to say how much money it will be able to devote to the Bay line this year. The West is pressing for completion.

## Our Senses Are Untrustworthy

Scientific Development Is Making Rapid Strides In These Modern Days

Though many disagree with the views held by Sir Oliver Lodge as to the life to come, few will challenge his right to be numbered among the select few who have changed radically the views educated men hold as to the physical side of the universe. Anything he cares to say as to electronics, matter, the ether, is worthy of attention, and must furnish food for reflection. A few days since, in the course of a lecture to an audience which filled the capacious Carnegie Hall in New York, he said, rapping a small wooden table: "This appears to be solid," and waving his arm in the air, "this appears to be empty; it is exactly opposite. You may not believe it, but it is true."

Such men as Soddy, Rutherford, John Cox, Thomson, and many other physicists tell of their senses, calculated but to serve certain vital ends, deceive us in everything which does not touch on the daily needs of corporeal existence. They speak with certainty on the electrical basis of matter, tell of a mysterious ether, which permeating all, is yet impenetrable to our senses; they show that our notions of such things as heat, light, and sound are founded on hypothesis that are fundamentally false and hence misleading, until the layman finds his head reeling and his confidence in the knowledge he had acquired as a lad slipping away.

The discovery of radium has strengthened the standing of geology; because it permits of a vastly extended time-scale. The earth is no longer regarded as a world gradually growing cooler. It has in its known store of radium a source of heat which, last, not for a mere million years, but probably for tens of thousands of million years. It is possible that the real danger to the planet will come from too high an internal temperature, rather than from one too low. In other words, the world is more likely to flash in explosion than as a dry, frozen body, as our forefathers believed. But as such a catastrophe is not hardly possible sooner than in about a million years this need not cause any particular uneasiness to the present earth folk.

The subject is much too vast for more than mention, and those who are sufficiently interested should read what has been written on it by the men of science named in the foregoing—there is quite a voluminous literature to be consulted. But, very recently, another surprise has been sprung, quite as significant as any previous theory of the ether, electrons and matter, and of this there is as yet little to be learned from books, it being the last-born of science. — Winnipeg Free Press.

## JOY AND GLADNESS FOR THE CHILDREN

Every child—whether it be poor or rich is entitled to joy and gladness. Health is the brightest of all and there is absolutely no doubt that the healthy baby is a happy baby. It is the baby's nature to be happy—no cross. Only the sickly baby is cross. The well child is a joy to the home—it is a laughing, gurgling, happy little piece of humanity which drives dull care from the household. The sickly child is the nightmare—he is a peevish; cries a great deal and is a source of constant worry to the mother. Baby's Own Tablets is the no more of your little one being sick. Regulate the baby's bowels and sweeten his stomach with a gentle but thorough laxative and Baby will soon be well and happy again. Thousands of mothers have proved this through their use of Baby's Own Tablets. There is a smile in every dose of the Tablets. Give them to your baby and make him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont.

## Wireless for Irish Cities

**Cutting of Telegraph and Telephone Wires Causing Trouble.**  
In consequence of the frequency with which telephone and telegraph wires in Ireland are being cut, the government has decided on an extensive use of wireless telegraphy there, says the Daily Mail.  
Naval signmen are being employed to start the system and the newspaper intimates that portable telephones with a radius of about 30 miles are being employed in transmitting messages from one police station to another or between adjacent towns. It is asserted that the system has proved satisfactory.

The Professor: I don't see the sense in the wife being so anxious to buy a kimono. Why, she couldn't play the bloomin' instrument if she'd got it.

Minard's Liniment Cures Burns, Etc.

**HEAVY WORK**

Your horses pull heavy loads over all kinds of roads—make their work easy—save your harness and wagon.

## Imperial Mica Aze Grease

prevents friction in the hub. As the mica flakes work into the pores of the axle and hub, the rough surfaces are smoothed with a hard filling of mica. The grease on the glassy surface insures thorough lubrication. Sold in sizes from a one pound tin to a barrel.

## Imperial Eureka Harness Oil

makes leather strong, pliable and waterproof. Prevents cracking and breaking of harness—cannot be overcome because pure mineral oil. It gives leather a rich black, lasting finish.

Sold in pint, quart, half-gallon, gallon and four-gallon sealed cans, half-barrels and barrels.

**IMPERIAL OIL LIMITED**

POWER, HEAT, LIGHT, LUBRICATION

BRANCHES IN ALL CITIES

## Protecting the Armenians

Public Will Not Tolerate Abandonment of the Armenians to Destruction

The only possible solution appears to be to make France the mandatory for Cilicia, if she will undertake the task. Cilicia used to be known as Lesser Armenia, and the remainder of the Armenian inhabitants must be protected. In the Sykes-Picot agreement Cilicia was included in the French "zone," while the Treaty of London gave France much more extensive authority in Anatolia. As for Armenia proper, it is understood that the plan is to link up the Turkish vilayets of Bitlis-Van, and Erzerum with the little Armenian republic of Erivan, in Transcaucasia. With sufficient help, such an Armenian State may be able to hold its own. The one thing the public will not tolerate is the abandonment of the Armenians to destruction. Mr. Lloyd George told the Armenian citizens of Manchester in 1918 that "those responsible for the government of this country are not unmindful of the responsibilities of your martyred race." The time has come to recall these responsibilities, incurred under the Treaty of Berlin and the Cyprus Convention, and still undischarged. Albania is threatened with obliteration, though the last word on the Albanian question is not yet said. Armenia must not share a like doom, or what becomes of our crusade for the salvation of the small nations?—From the London Times.

## Canadian Flax Trade Growing

**Proposed to Encourage the Establishment of Spinning Mills in Canada**

At a meeting of the Canadian Flax-Growers' Association, held in London, Ontario, recently, the members discussed a plan to extend the organization. It was pointed out that the acreage under flax has been more than doubled since the start of the war, and the quality of the Canadian seed and fiber demonstrated not only in Ireland, but all over the world. In view of this it is proposed to encourage the establishment of spinning mills in Canada on a large scale; also to bring experienced weavers to Canada from Ireland and start the industry on a sound basis. The final decision on this matter was left over until the June meeting. Several growers are favor of having the flax graded. They will ask the Dominion government to impose such restrictions on the sale of flax that the quality of all Canadian seed put on the world market will be the best possible.

No matter how little a man believes in religion, he detests irreverence in a woman.

W. N. U. 1310

## Exchange Situation Impetus for Settlers

Americans Taking Good Advantage Of Rate of Exchange in Buying Farms

One of the results of the present high Canadian exchange has been made apparent during the last few weeks. Americans intending to settle in Western Canada are leaving the United States sooner than they planned and in much larger numbers than was expected. The exchange situation has proved a stimulant to American settlement in Western Canada, because the settlers find they can gain from \$1.25 to \$4 an acre in purchasing land. Many Americans who had purchased farms when exchange was normal, and had money in the banks, have taken advantage of the low quotation of Canada's money, and cleared off their deferred payments, making a large saving.

Americans of means are paying cash for their farms. With the rate of exchange as it is today, the saving on a quarter-section of land at \$35 an acre is about \$840, which is quite an item on a \$5,000 transaction, while the ready money thus put into circulation is having a beneficial effect throughout the west, both on investments and general trade.

Minard's Liniment Relieves Neuralgia.

## Predicts Rush Into Peace River Area

Oil Fields Greatest in World Says

Lieut.-Col. J. K. Cornwall  
Ottawa.—The summer of 1920 promises to see the greatest rush into the Peace River country that has ever been seen into any section of Canada, is the prediction of Lieut.-Col. J. K. Cornwall, who is here conferring with government departments in connection with matters of interest to the north country. Col. Cornwall, probably the best known figure in Peace River, a trapper and trader of 25 years' activities in the north, has been attending the fur sale at Montreal, where prices soared to a point that placed the fur industry of Peace River on a new high pedestal. "Watch the Peace River this year," said the enthusiastic Colonel, "will there be oil discovered?—I certainly expect so. As a matter of fact, my opinion is that the year 1920 will see the opening in this north country of the greatest oil fields in the world. Texas, in my view, will virtually fade away in comparison with the result that '20' fall and early spring the Peace River country will be in the throes of an oil stampede into the north that has had no precedent in this continent."

Hero: I've had my nose broken in two places.  
Sweet Thing: Well, you shouldn't have gone into those places.

## ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

**BAYER**

For Colds, Pain, Rheumatism, Aching Joints, Lumbago, Sciatica, Neuritis, and for Headache, Neuralgia, Toothache, Earache, tooth Aspirin marked with the name "Bayer" or "Aspirin" is the only genuine Aspirin. Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real relief. Aspirin is the genuine Aspirin prescribed by physicians for over nine years. Now made in Canada. Handy tin boxes containing 12 tablets cost but a few cents. Drugists Aspirin in an unbroken "Bayer" also sell larger "Bayer" packages. There is only one Aspirin—"Bayer"—You must say "Bayer". Aspirin is the trade mark registered in Canada of Bayer Manufacturing of Monrovia, California. While it is well known that Aspirin means Bayer Manufacturing, to avoid the public against imitations, the Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

**PARTRIDGE Tires**

Game as Their Name

"A well shod horse travels surest and farthest"

THE car equipped with Partridge Tires runs almost free from the delays and inconveniences caused by tire troubles. Partridge Tires have so unquestionably proved their dependability and economy that they are to-day recognized as "the most service for your money" tires.

## One Trial of Grape-Nuts

will do more than many words to convince you of the goodness of this wheat and barley food.

But it's worth saying that Grape-Nuts contains all the nutriment of the grains, is ready to eat, requires no sugar and there's no waste.

**Grape-Nuts is a Builder**
